

S-5!®

The Right Way!

S-5-PV Kit Attachment Solutions

The S-5-PV Kit continues to be the easiest, most cost-effective way to install solar panels directly to concealed-fix, screw-fix and standing seam metal roofs. When combined with the appropriate S-5! clamp to suit the roof profile (S-5-K Mini, S-5-K700, S-5-U Mini or S-5-B Mini), the advantages of using the S-5-PV Kit as an array mounting system are unparalleled. No L-feet, no rails, no leaks and no worries!

S-5-PV Kit: A Breakthrough in PV Mounting Technology

The new S-5-PV Kit is one of the first solar module mounting solutions in the industry to be listed to the new UL 2703 and also an ETL listing to UL 1703, standards which cover both electrical connections (bonding) between and mounting facilities for flat-plate photovoltaic modules and panels.

The S-5-PV Kit's NEW stainless steel mounting disk has twelve nodes designed to ensure the module-to-module conductivity of anodized Aluminium module frames. With the new S-5-PV Kit, the module is anchored and automatically bonded to the rest of the array. No earth lugs or wire conductors are required except to connect one string of modules to another and to ground the system.

The cable management retaining clips on the underside of the embossed disc provide an innovative and simple cable management solution without the need for cable ties or trunking.

All this connection detail represents massive cost savings and in most cases, the savings in installation time and materials is sufficient to pay for the entire S-5-PV Kit and clamp setup!

S-5-PV Kit Summary

- Fits the majority of solar panels on the market (frame thickness 33-64mm)
- Fits the majority of metal roofs on the market when used with S-5! Clamps and brackets
- Quick, easy and cost effective installation
- Electrical bonding provided between modules
- Universal fit for both mid and end clamp locations
- In-built cable management
- Can be used with all S-5! Mini clamps (S-5-K Mini, S-5-K700, S-5-U Mini, S-5-B Mini)
- Can be used with both the TopFix CorruBracket-AU and VersaBracket-47

Due to varied applications, PV Kits are sold separately to clamps.

As part of the quality offering from RPS, we recommend the use of our gasket and fastener accessories for the S-5-K, S-K Mini and S-5-K700. The use of a gasket increases the versatility of fit across the large range of Australian roofing profiles. The gasket also offers increased galvanic separation and can provide increased resistance to the effects of thermal cycling due to repeated hot and cold temperature fluctuations. The longer stainless steel fasteners and spring washers allow for an even easier clamp assembly and installation.

Our gasket and fastener accessories are the perfect complement to S-5! Clamps.

For more information regarding clamp selection and available accessories contact **RPS** on **1300 695 404** or visit **www.roofclamps.com.au**
