

**\$2,000  
REBATE  
AVAILABLE**

## **FUTURE-PROOF YOUR HOME WITH THE FRONIUS ENERGY PACKAGE.**

Energy storage takes us a huge leap forward towards 24 hours of sun: a 100% sustainable energy future where it will be common to see a house with large solar PV, sufficient energy storage, electric vehicles and zero use of gas for heating, cooking, etc.

Many Australian's believe in a vision of 24 hours of sun and would like not only to install solar PV with battery storage, but also to move from gas/fuel to electric as soon as possible to take full advantage of the energy they generate from solar.

For a limited time only, Fronius is helping to make this transition easier by offering a \$2,000 rebate to customers who wish to upgrade their connection from single to three phase when they install a Fronius Energy package (terms and conditions apply, see reverse).

Don't miss out on this opportunity to bring your home into a 24 hours of sun future with the Fronius Energy Package.

**You are 24 hours of sun!**

# PREPARE YOUR HOME FOR A 24HRS SUN FUTURE.

## Advantages of three phase

- / Three-phase allows higher penetration of solar PV into the network. In many cases, three-phase allows you to install a larger PV system so you can store more electricity.
- / Charging of electric vehicles is up to five times faster with a three-phase connection.
- / Three-phase appliances are more energy efficient.

Upgrading the electricity supply point from single phase to a three-phase connection can cost anywhere from a few hundred dollars to a few thousand. However, it is something that only needs to be done once. Up until June 30, 2016 Fronius Australia will offer a \$2,000 rebate on the 5kW/12kWh 3-phase Fronius Energy Package (comprising 5kW inverter and 12kW battery) if a customer upgrades their connection from single phase to three phase.

## Terms and conditions

- / The \$2,000 rebate will be given as a credit to official sales partners that order the Fronius Solar Battery directly from Fronius Australia Pty Ltd. The Fronius Sales partner will then reimburse installers that order the 12kWh Fronius Solar Battery on behalf of the end customer.
- / The \$2,000 rebate is only valid for a Fronius Energy package that includes the Fronius Symo Hybrid 5kW and the 12kWh Fronius Solar Battery.
- / The \$2,000 rebate is only valid when the system owner upgrades their mains electricity connection from single phase to three phase. If the system owner already has a three-phase connection, the \$2000 rebate offer is not valid.
- / You will receive an email notification that the rebate has been authorised within 5 to 10 business days from the time it has been submitted to Fronius Australia Pty Ltd.
- / Only claims made via <https://goo.gl/OgJLQf> will be accepted as valid.
