Horizon Power's Renewable Energy Buyback

You can reduce your electricity bill by generating some of your own electricity. If you don't use all the electricity you generate, Horizon Power can buyback excess electricity you are able to export into our electricity system.

Horizon Power offers one flat buyback rate per town, for all types of customers. The rate reflects Horizon Power's cost of electricity generation in your town.

The Renewable Energy Buyback rate will be reviewed annually and may increase or decrease depending on various factors, including changes in our electricity generation costs.

Some Commercial customers have a bespoke price agreed with Horizon Power. These customers have received confirmation of their buyback price.

*Commercial contracts are not offered in these towns.
