

CHARGING THE FUTURE

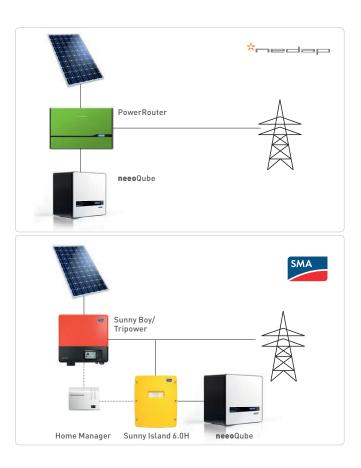

Solar Energy Australia distributor of

neeoQube

THE HIGH-EFFICIENCY STORAGE UNIT FOR RENEWABLE ENERGIES.

- Environmentally friendly lithium-ion battery technology
- Service life up to 20 years
- High cycle life at high currents
- Unrestricted partial cycling no memory effect
- Fast charging: fully charged in 1 hour
- Technology tested by automotive safety standards
- Efficient and silent operation due to fanless cooling
- Ventilation, winter mode or service charging not required
- Integrated protection fuses
- Integrated battery management
 - Deep discharge protection
 - Voltage- and temperature monitoring
 - Charge balance between the cells
 - Determination of the charging and ageing status (SOC and SOH)
- Developed according to German industry standards (DIN)

* According to our terms of guarantee, ** @ 80 % DoD and 1C

AKASOL

HIGH PERFORMANCE BATTERY SYSTEMS MADE IN GERMANY WITH OVER 20 YEARS EXPERIENCE.

The German company AKASOL is one of the world's leading developers and producers of mobile and stationary high-performance battery systems. Fields of application of the award-winning storage solutions are the commercial vehicle

TECHNICAL DATA Voltage 48 V Capacity 106 Ah 5.5 kWh Energy 5000 Cycles** Power nom. 5 kW Power max. (10 s) 15 kW Protection class IP 50 Possible operation range 0° to +40 °C 85% non condensing Max. humidity 2 screw terminals 35 mm² Power connection Efficiency battery up to 98% Voltage range @ 48 Vnom 37,8 V to 58,8 V Dimensions (W D H) 45,6 cm x 28,2 cm x 45,6 cm Weight 62 kg

and automotive industries as well as the shipbuilding and wind energy, hydropower and solar sectors.
